The TeamMate Blockchain Solution integrates the health, fitness and wellness industries into a
UNIFIED BLOCKCHAIN ECOSYSTEM

EXECUTIVE SUMMARY

WEBSITE

WHITEPAPER

BOUNTY PROGRAM

Data in this ecosystem is owned and monetized by users

TeamMate Protocol (TMP) is the internal currency of the TeamMate Blockchain Solution

WELLNESS INDUSTRY

FITNESS INDUSTRY

MEDICAL INDUSTRY

The TeamMate Blockchain Foundation meets Health Level Seven (HL7) Fast Healthcare Interoperability Resources (FHIR) standards

HL7 FHIR compliant APIs can participate in a growing digital international health community

Fitness Data is a Vital Sign

... and the future of preventative care

KEY FEATURES

SUSTAINABILITY | SCALABILITY | THROUGHTPUT

- CROWDFUNDING

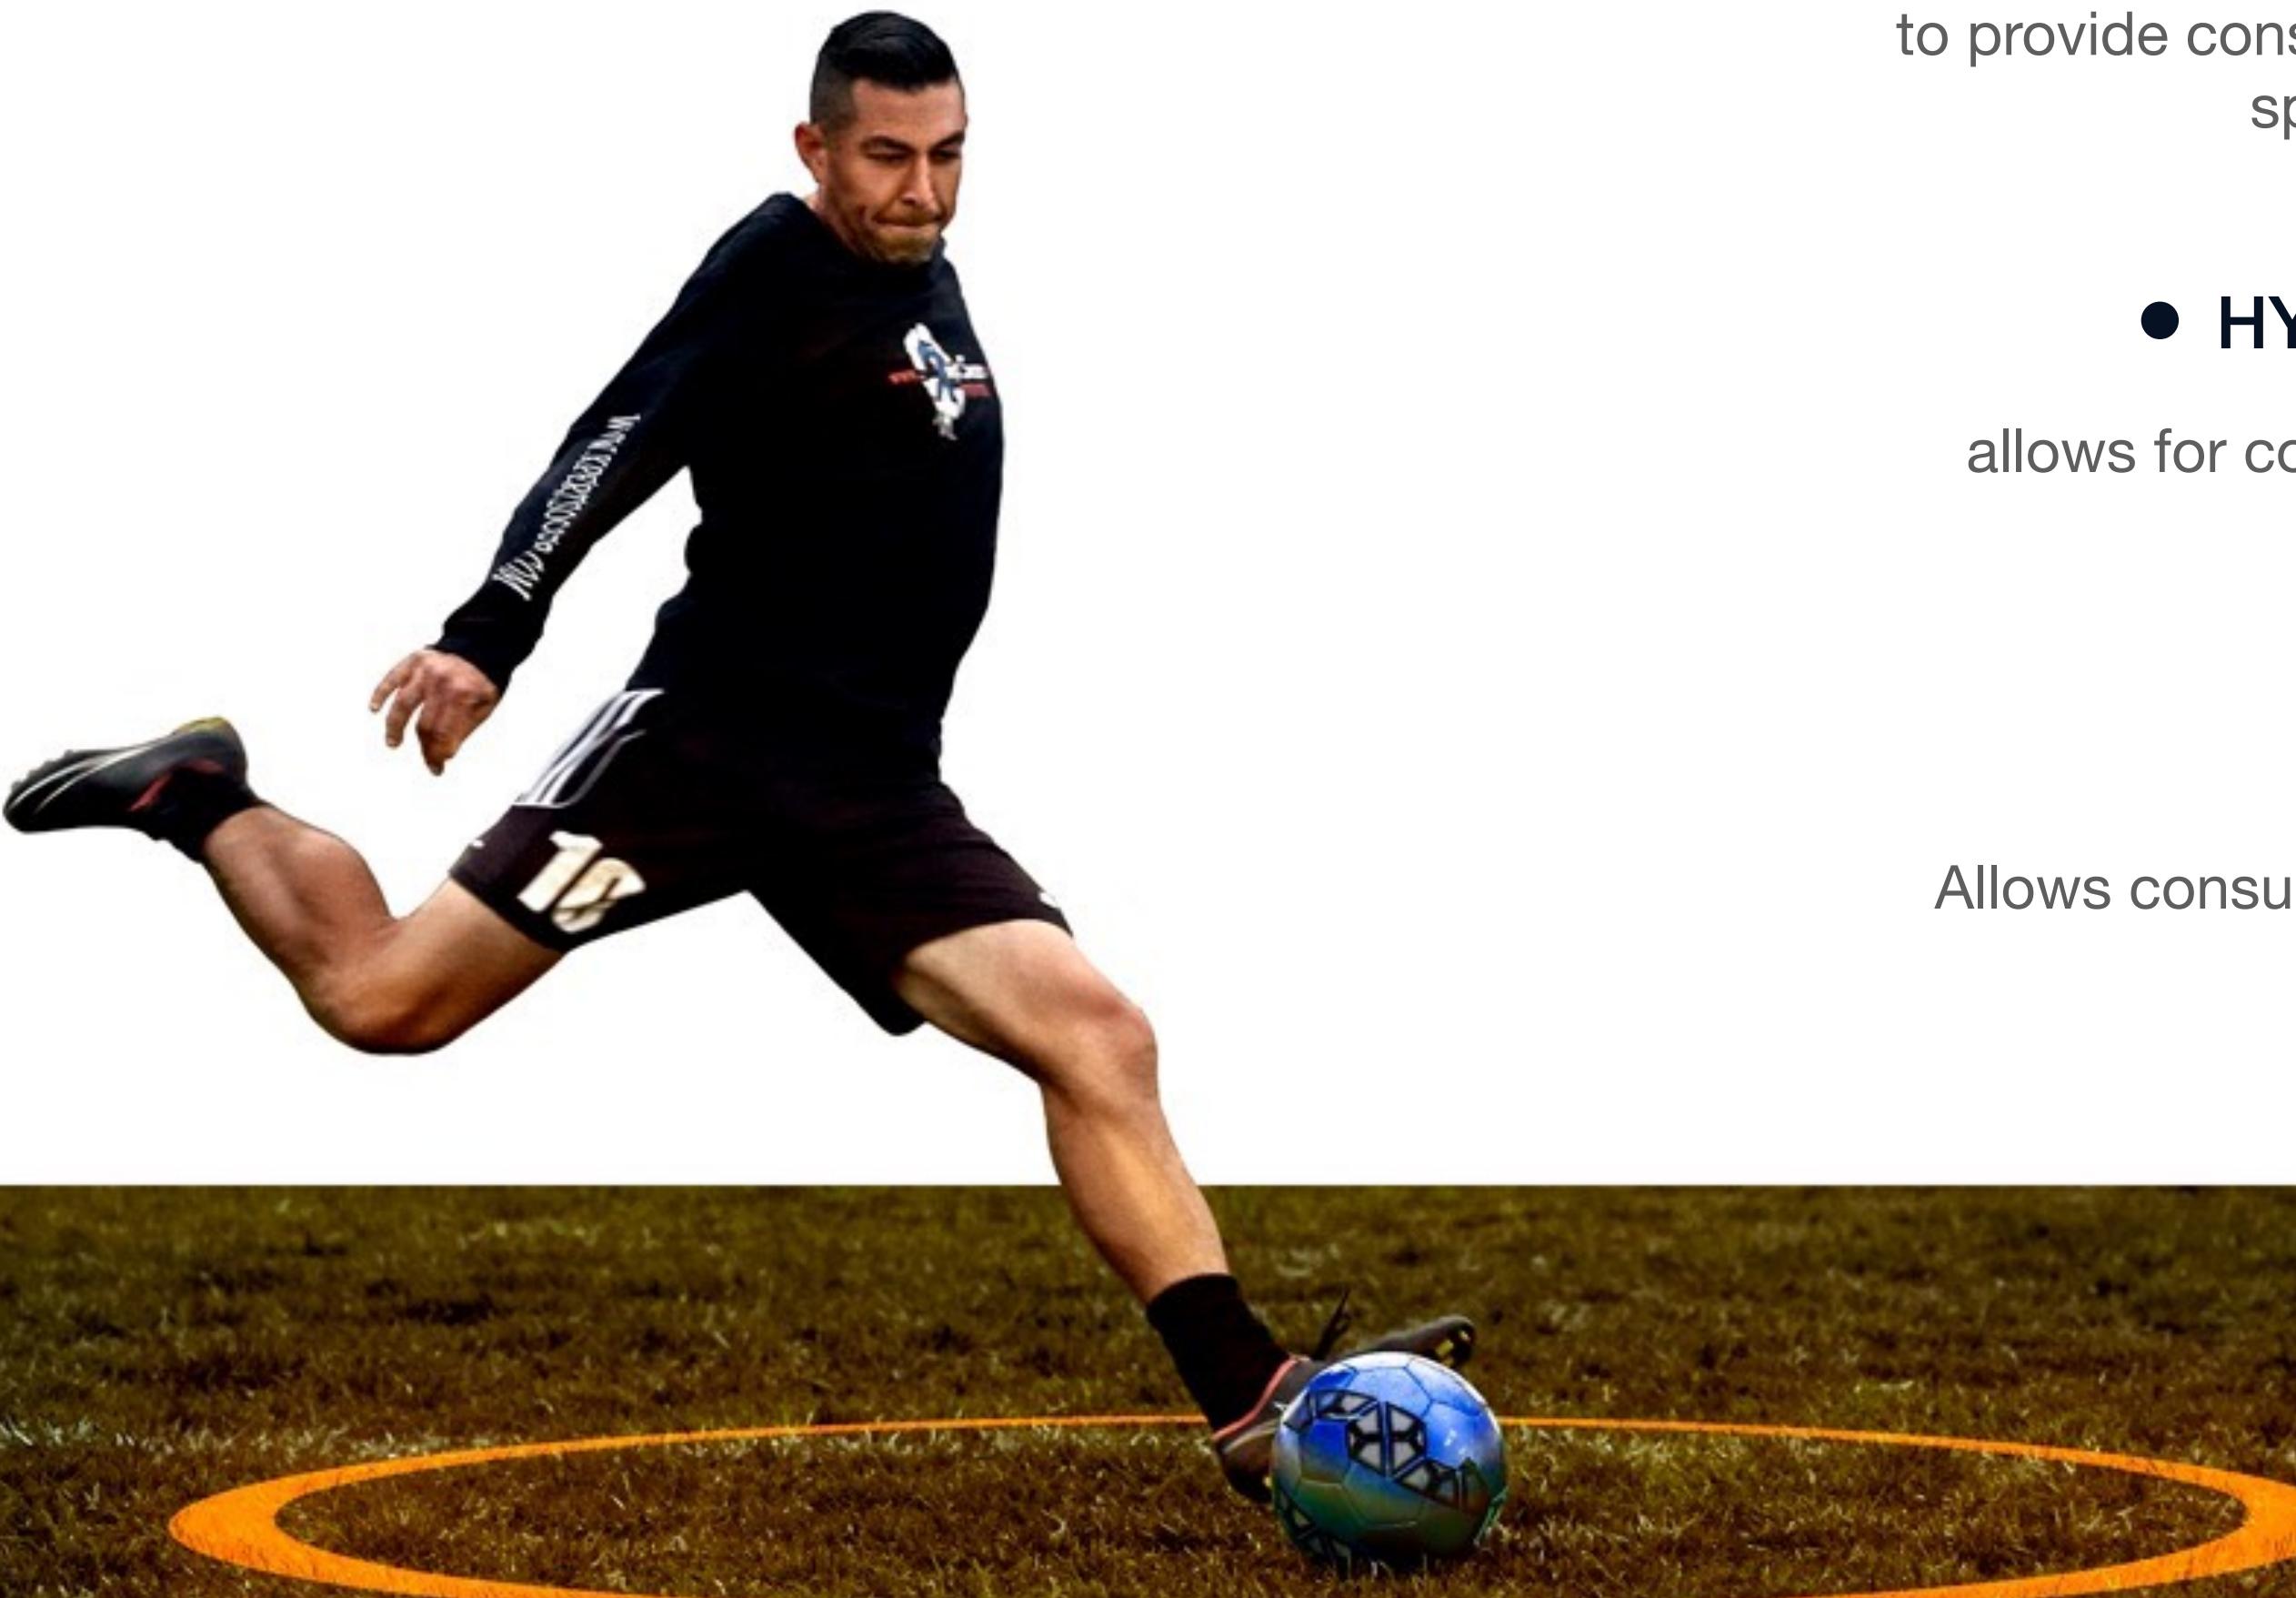

to provide consumers with the opportunity to directly fund intramural sports events and/or local fitness facilities.

- HYBRID CONSENSUS (PoW/PoS/PoA)

allows for community members to earn TMP for various actions within the network

- VOTING GOVERNANCE

Allows consumers to vote on upgrades to the platform using TMP tokens

KEY FEATURES

SUSTAINABILITY | **SCALABILITY** | THROUGHPUT

- **MODULAR DESIGN**

allows multiple groups to utilize the network as individual corporate entities instead of as a group

- **OPTIMIZED FOR DATA-SCALING**

parallel processing infrastructure allows platform to process independent transactions simultaneously

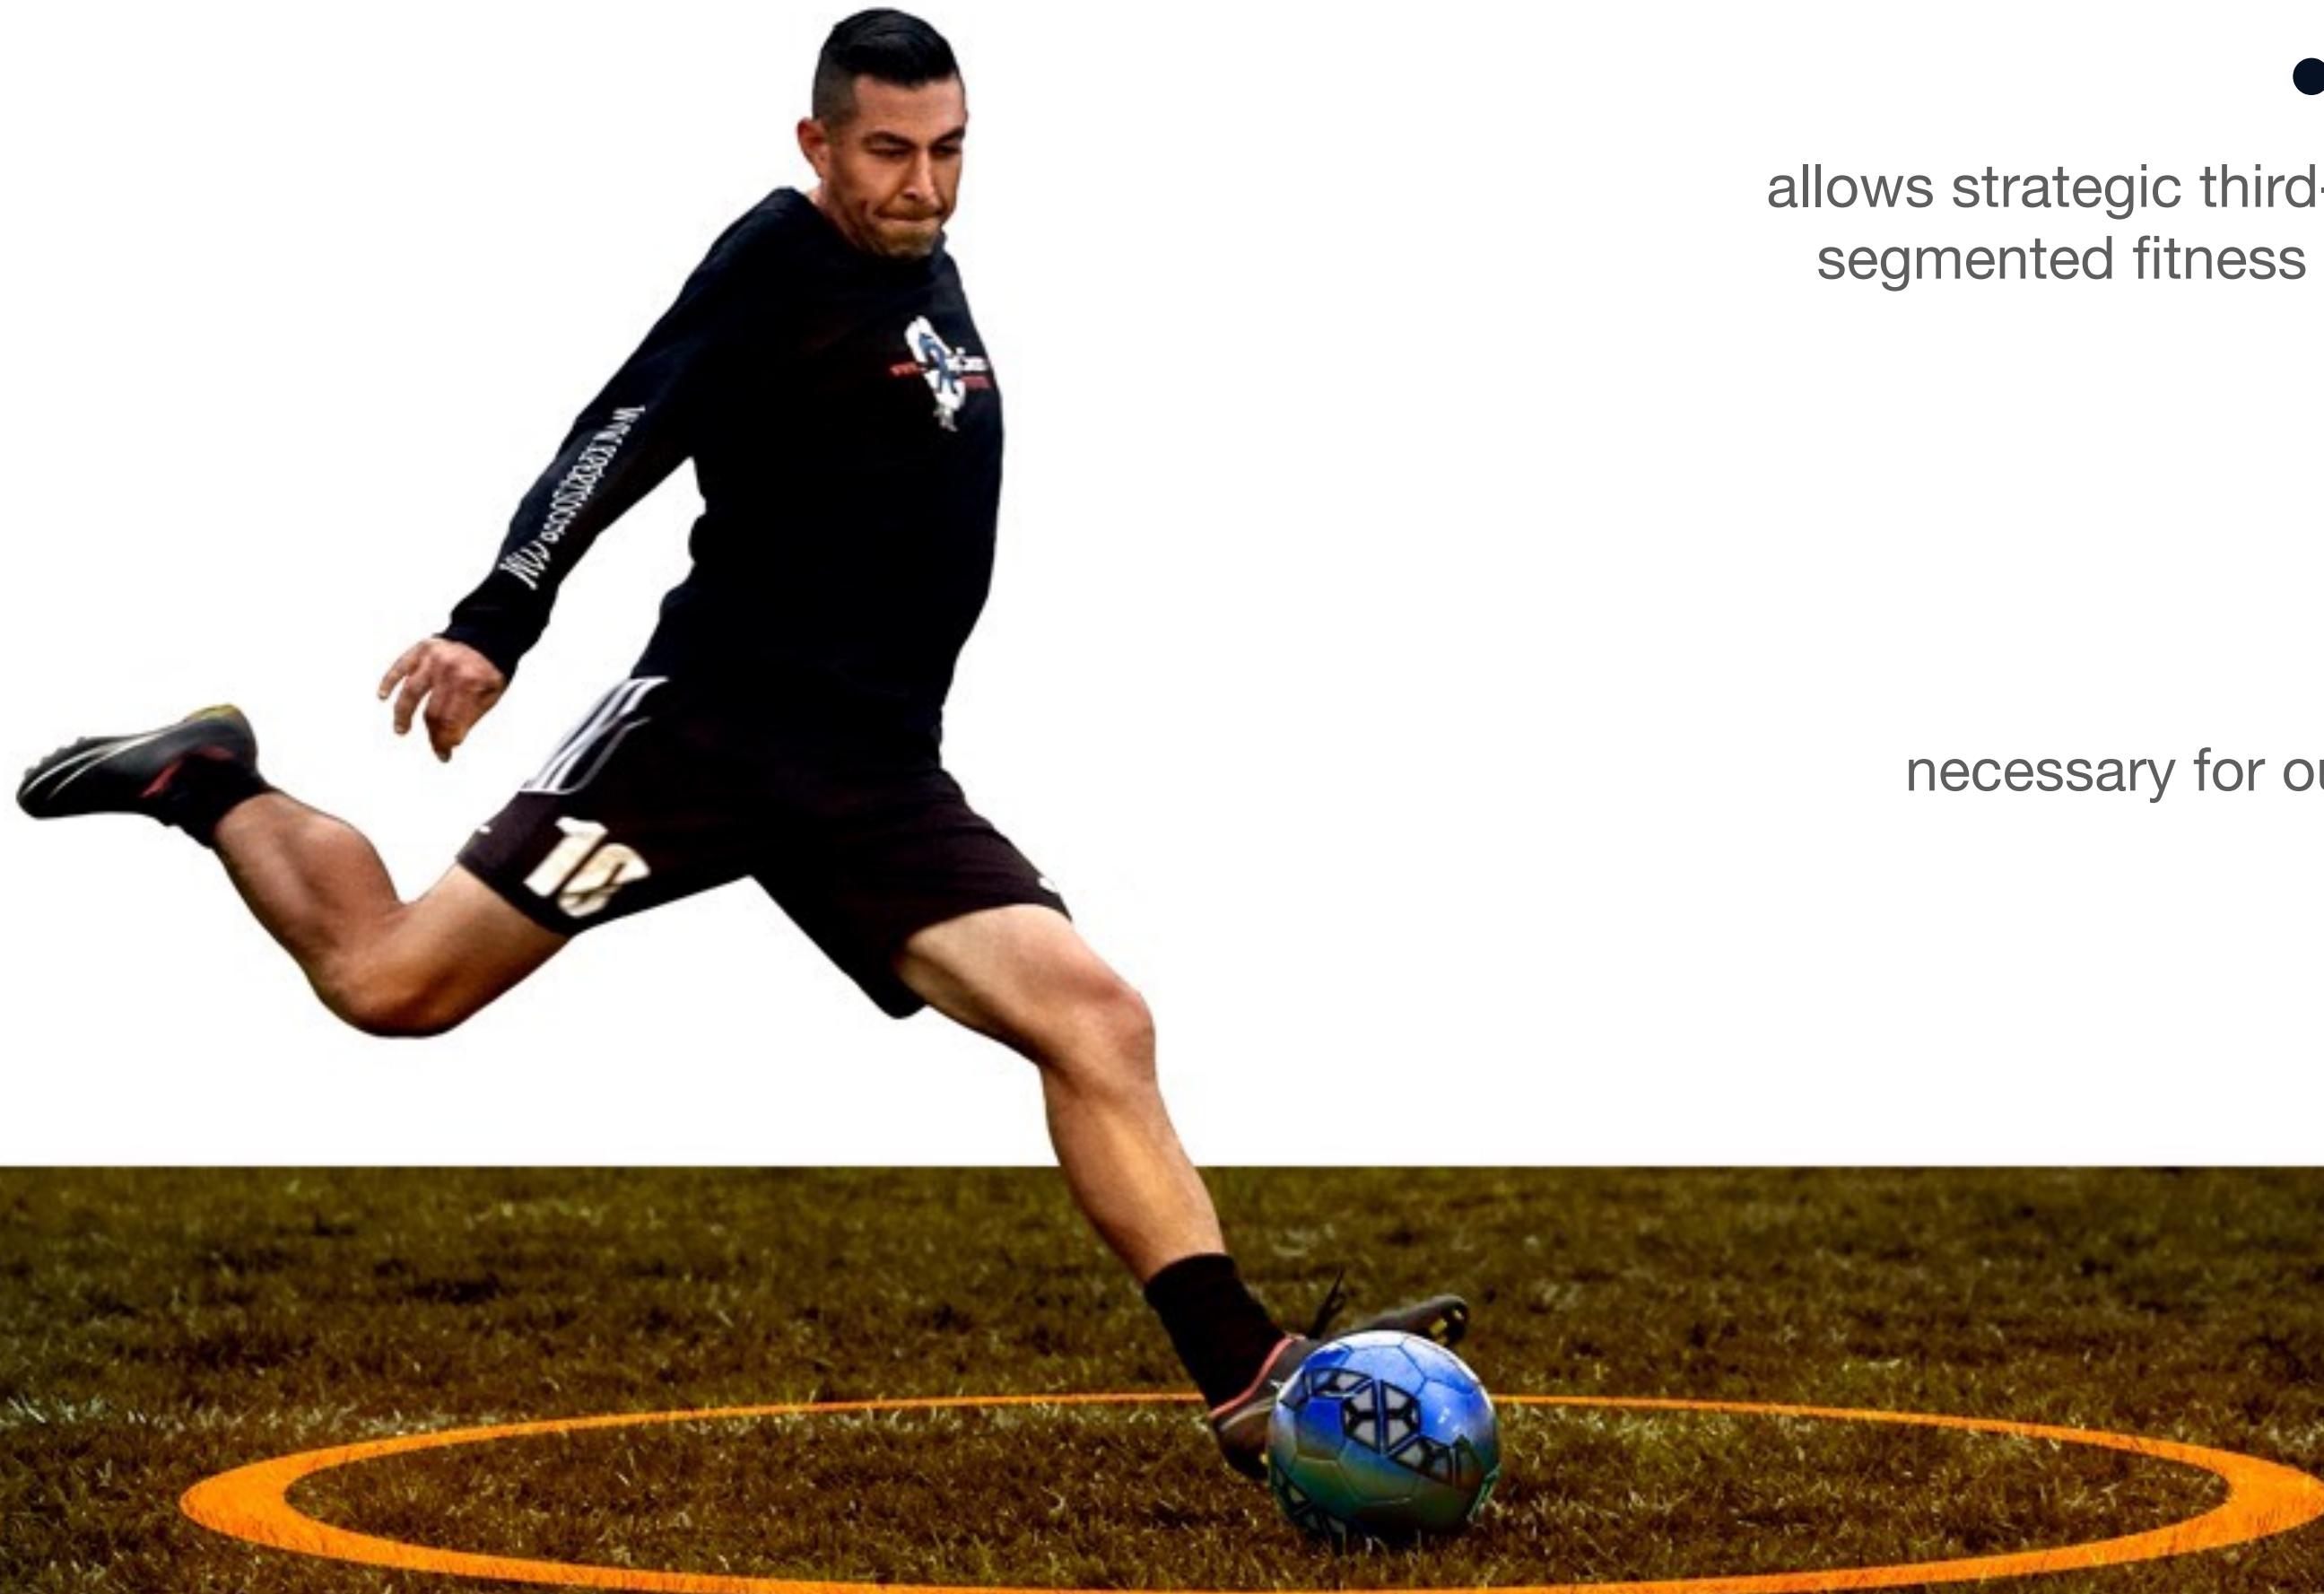

- **TOKEN CURATED REGISTRIES**

whitelisting good actors (validators, trainers, third party providers) who secure and encrypt data passed through the network

KEY FEATURES

SUSTAINABILITY | SCALABILITY | **THROUGHPUT**

- **SIDE-CHAIN MANAGEMENT**

allows strategic third-parties to create unique chains to store and secure their segmented fitness data while still having access to the greater ecosystem through the use of TMP tokens

- **BONDING**

necessary for outside corporations to access data from consumers on the platform

The TeamMate Blockchain Solution will ultimately operate on a hybrid Proof of Work/Proof of Stake consensus mechanism.

Proof of Stake Consensus leader election can be thought of as a raffle:

In a raffle, probabilistically, if Bob has more tickets than Alice, he is more likely to win.

In a very similar manner:

In Proof of Work, if Bob has more computational power and energy than Alice—and thus can output more work—he is more likely to win (mine the next block).

Similarly, yet again:

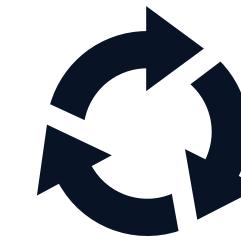

In Proof of Stake, if Bob has more stake than Alice, he is more likely to win (“mine” the next block).

Proof of Stake takes away the energy and computational power requirement of PoW and replaces it with stake. Stake is referred to as an amount of currency that an actor is willing to lock up for a certain amount of time. In return, they get a chance proportional to their stake to be the next leader and select the next block.

The creator of a new block is chosen in a pseudo-random way, depending on the user’s wealth, also defined as ‘stake’. In the PoS system, blocks are said to be ‘forged’ or ‘minted’, not mined. Users who validate transactions and create new blocks in this system are referred to as forgers and will be rewarded with a TMP transaction fees.

TEAMMATE PROFILE LINKED TO CRYPTO-WALLET VIA API

PRIVACY PROTECTION + UNIVERSAL AWARENESS

**COMBINED POWER OF A BLOCKCHAIN SOLUTION
AND A SOCIAL MEDIA PLATFORM**

CRYPTO CREDENTIALS

CONTEXTUALIZED DATA

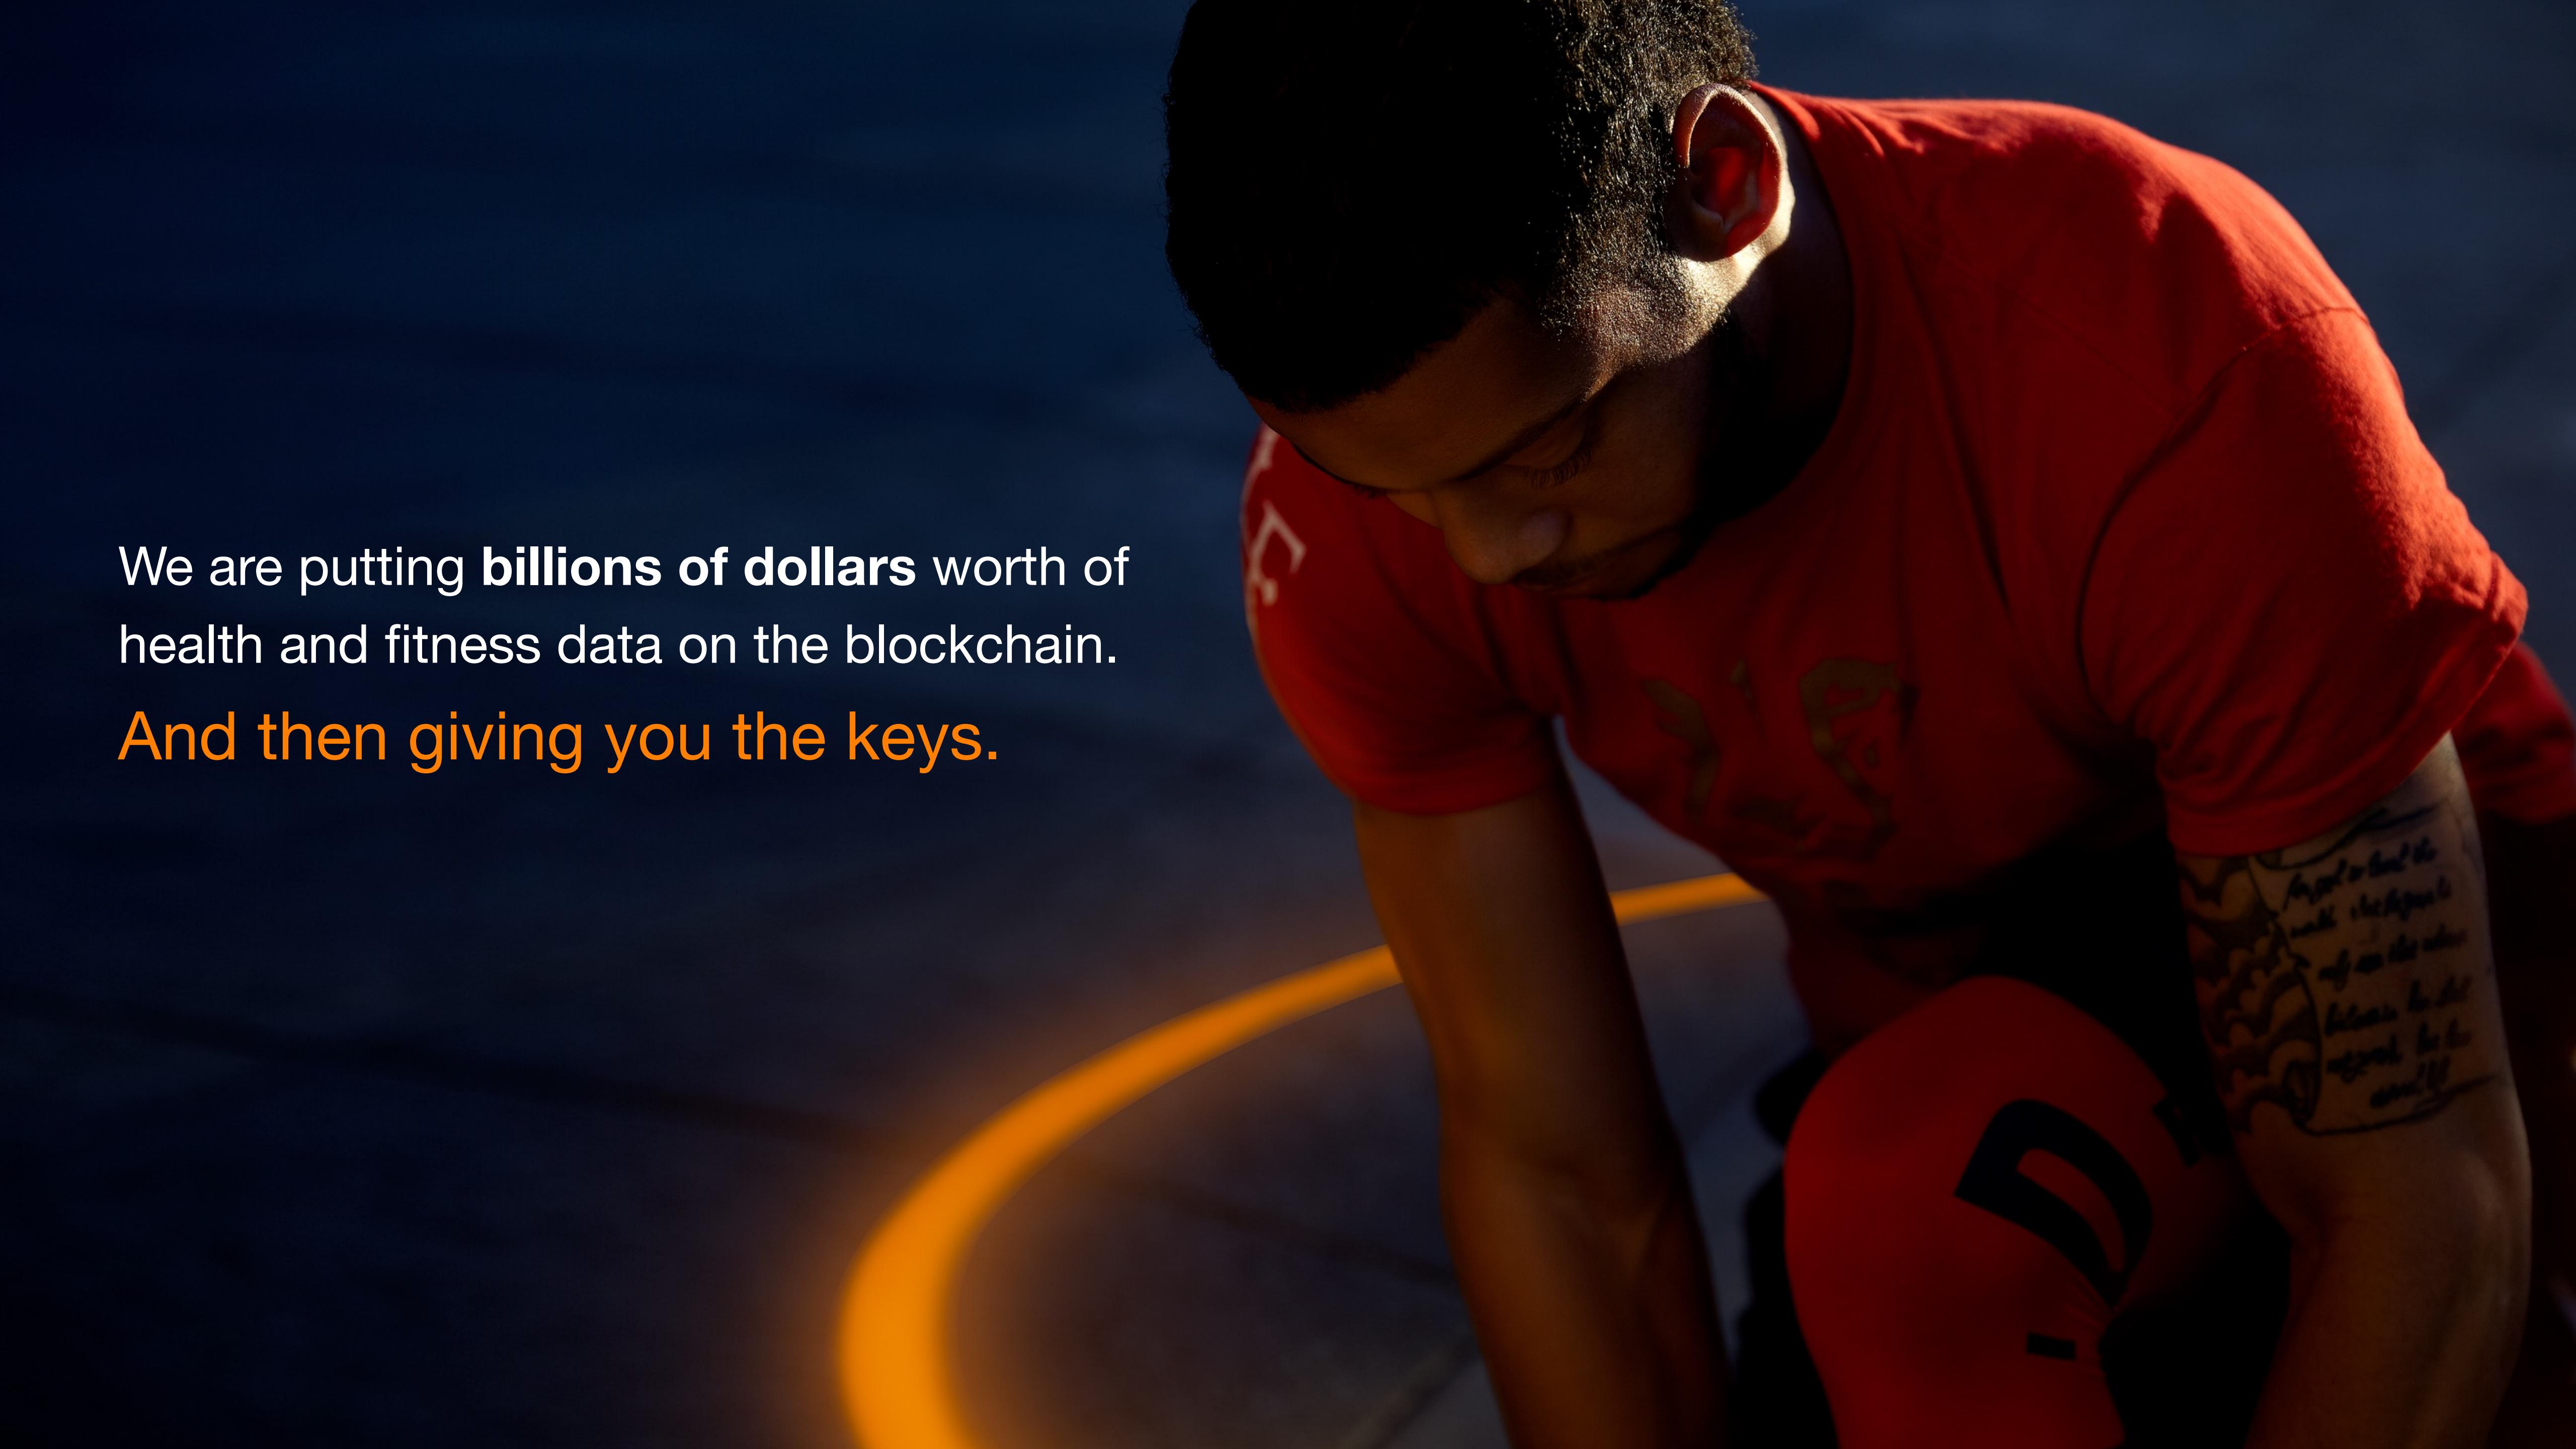

LIGHTWEIGHT WALLET

TeamMate INC donates data to the TeamMate Blockchain Foundation.

The only authorized entity that can profit from the final value of the data is the user.

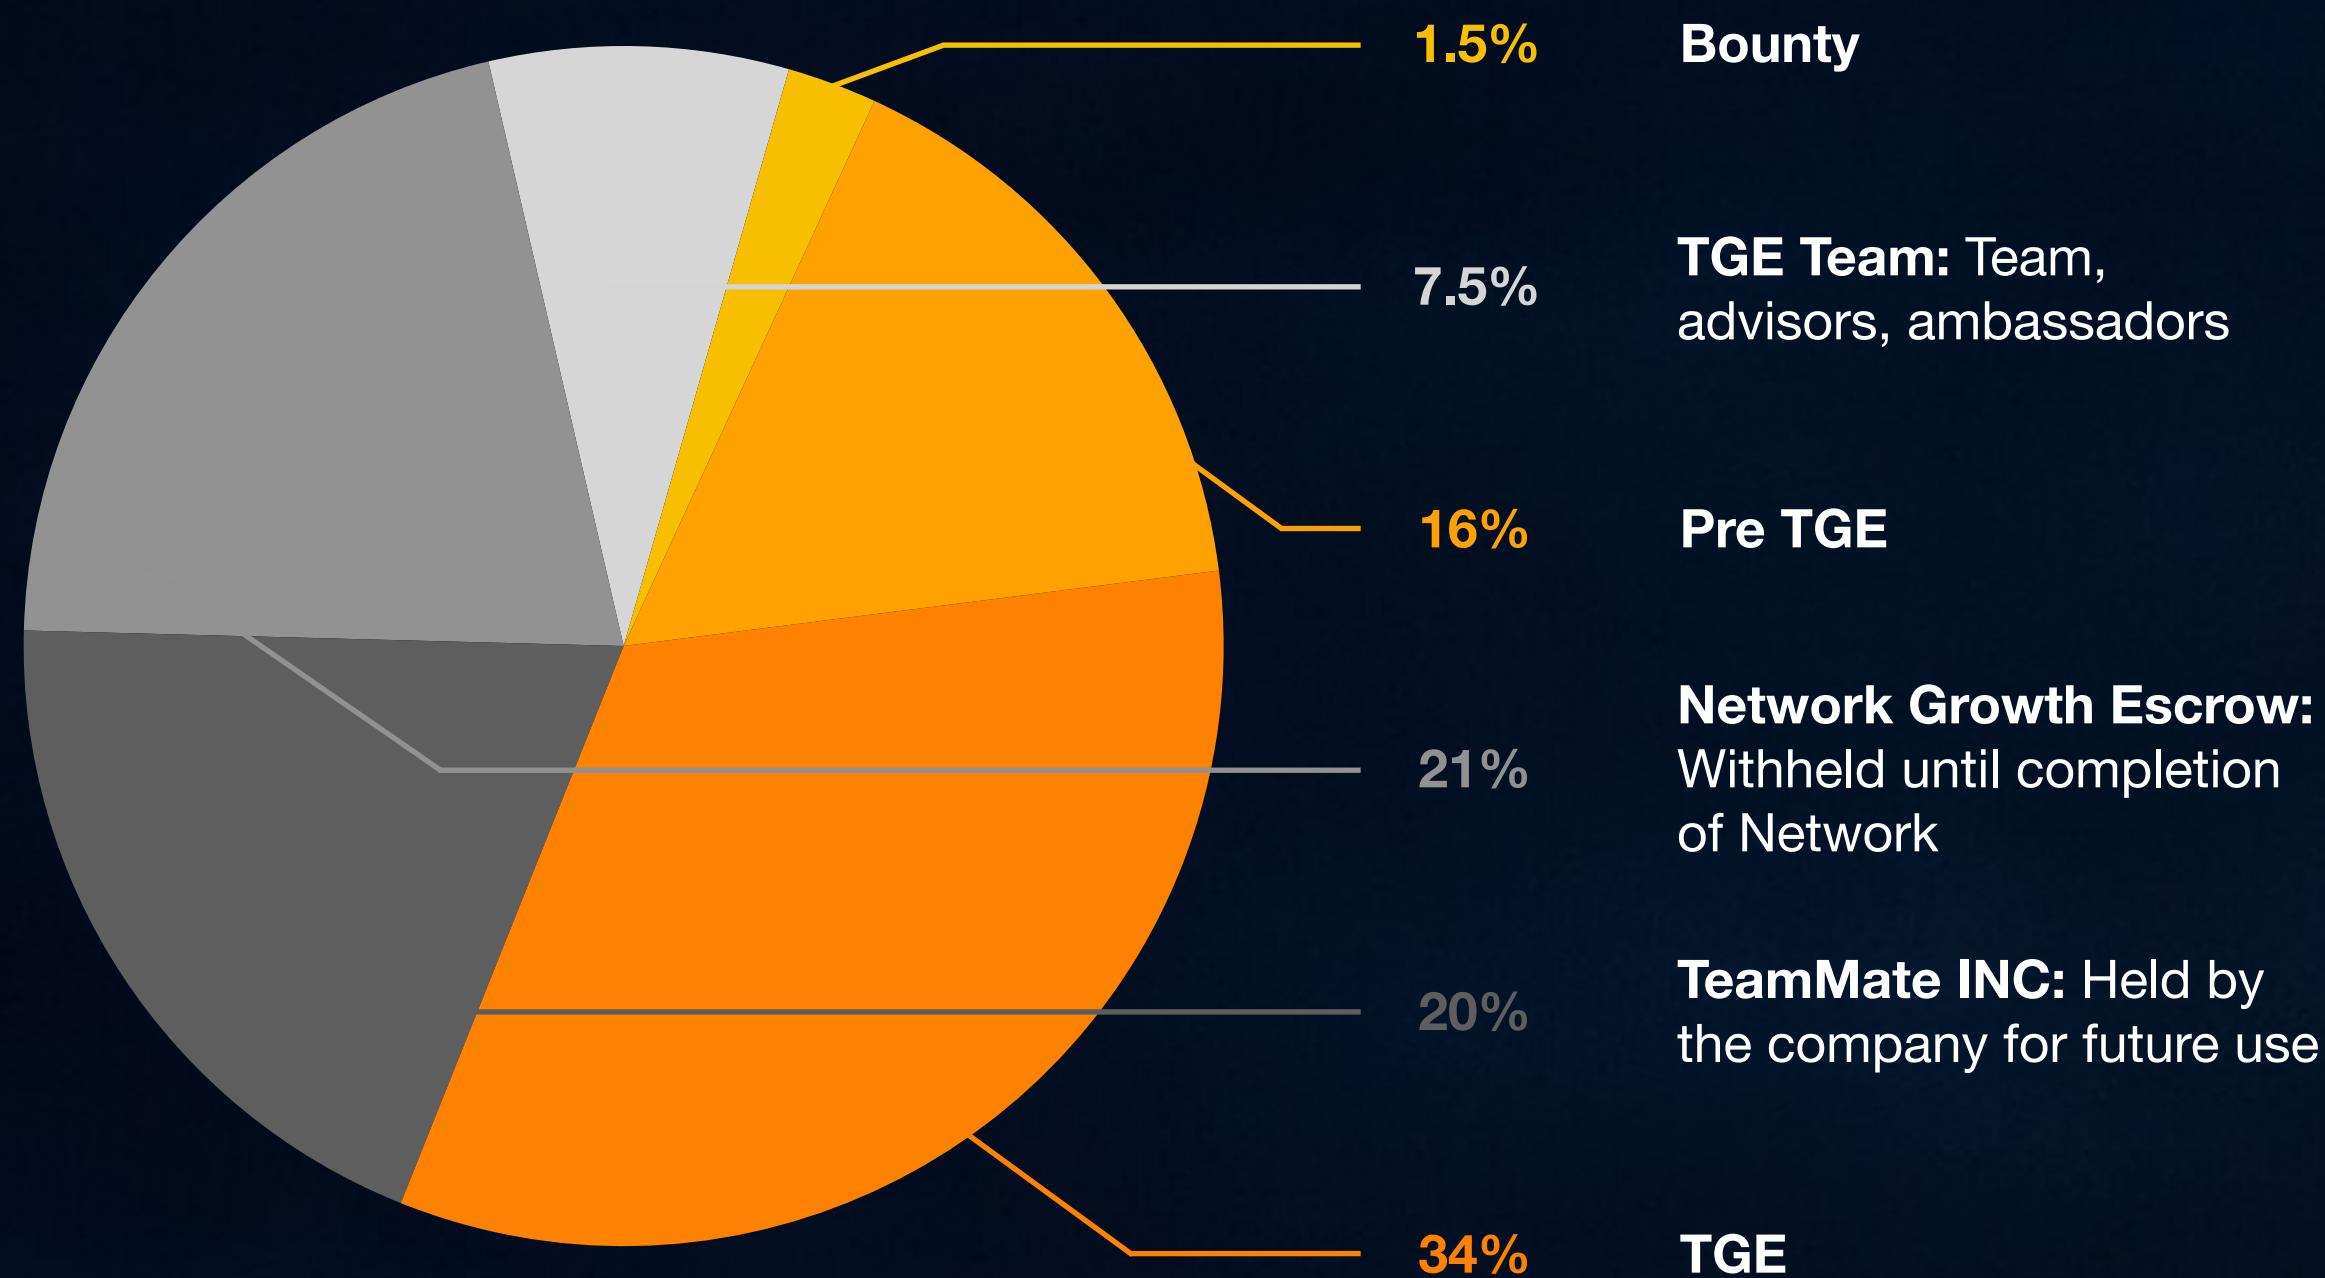

A close-up photograph of a man from the side and slightly behind. He is wearing a bright red hoodie over a white t-shirt. On his left ear, he wears a pair of black headphones. He is looking down at a small device held in his hands, which appear to be a smartphone. His gaze is directed downwards and to the right. The background is dark and out of focus.

We are putting **billions of dollars** worth of
health and fitness data on the blockchain.

And then giving you the keys.

PRICE STRUCTURE | TOKEN DISTRIBUTION

	Token Available	Stage	Price (TMP / USD)	Discount
Pre TGE	162,000,000	Flash Sale (1st 24 hours)	39	63%
TGE	338,000,000	Stage 2	36	50%
		Week 1	30	25%
		Week 2	28.5	19%
		Week 3	27	13%
		Week 4	25.5	6%
		Week 5 until sale end	24	0%

The TeamMate Protocol (TMP) will be released as an ERC223 token

AUTONOMOUS | ORGANIZATION

A portion of each block reward will be granted to a Decentralized Autonomous Organization (DAO) in which users can submit ballots to receive self-funding for various iterations of the TeamMate Network

Examples include:

- Funding for intramural sports leagues
- Funding fitness & health start-ups
- Funding for development of the network
- Funding for sports equipment/uniforms
- Funding athlete sponsorships
- Implementation of new activities into the platform
- Upgrades to TMP Utility Use-Cases
- Improvements to the staking functionality
- Front-end development on the TeamMate App

PROOF of CONCEPT

Lympo's Market Cap:
February 2018: \$13m (ICO)
June 2018: \$72m

PROOF of CONCEPT

“Dallas Mavericks and Lympo announce multi-year partnership to promote health and fitness tech.”

“The Mavericks found clear alignment with Lympo’s mission to create a healthier world by utilizing the latest technology to encourage fitness and healthy living in a whole new way,” said Mark Cuban, owner of the Dallas Mavericks. “Through the platform, fans will be able to earn free tickets and merchandise by completing Mavericks fitness challenges on the Lympo app. We are eager to launch this fall.”

PROOF of CONCEPT

- Renaming Mav's facilities: **Lympo Training Facility** and the **Lympo Training Court**
- New practice jerseys featuring the Lympo logo
- Creation of a new Mavericks Fitness Team
- Future integration of Lympo cryptocurrency tokens in Mavericks blockchain initiatives, including an option to purchase tickets.

The Mavericks will also work with Lympo in the future to integrate Lympo's blockchain technology and cryptocurrency with the Mavericks ongoing blockchain initiatives. The Mavs will be one of the first teams in the NBA to accept various forms of cryptocurrency for tickets and merchandise beginning in the 2018-19 season.

PROOF of CONCEPT

The screenshot shows a Steemit beta page with a post titled "Lympo ICO Review". The post is by user "whenlambo" and is 5 months old. It includes a logo for "Lympo". The post content discusses the Lympo app and its blockchain solution, mentioning competition with TeamMate and gymformed, and questioning its legal compliance with HIPPA and EU laws. A reply from "whenlambo" suggests the market is too large for one company to succeed.

Trending New Hot Promoted

ult (25) · 4 months ago

There is competition in this field. Check out TeamMate and gymformed, both are actually farther along I feel. They are still in stealth mode. Both are based in Silicon Valley USA.
<https://www.youtube.com/user/StillW1ll>.

That being said, i do not see why Lympo app is an improvement that the already hundreds of other health app's that already exist and provide real discounts and markets; the Under Armor app and 24hr app i use both and love; and they both have features not even listed in lympos whitepaper.

In addition, i am thinking even though the blockchain might be able to solve problems they listed in their whitepaper - i question regardless of their solution on whether it will be HIPPA or EU's insanely restrictive laws compliant. Vital signs even by a fitbit IS health info. In the USA all health data (p23 referencing physician) must legally be transmitted via VPN and encrypted; even having escaped ENCRYPTED data outside your network is illegal - huge fines and requires notices to affected patients (bottom p23 is wrong per HIPPA). Sooooo.... this product/feature/app - as stated in the white paper - will never be used inside the US or EU for legal reasons by physicians, health care companies, insurance companies?!

Thoughts???

There are other countries that will allow this and the market is so big for one company to take the hall pie, so why won't they succeed
